

# Future Proof - World's Coating Innovator™

**NEotech Coatings provide a bespoke range of innovative and unique industrial coatings that sustainably take on Australia's and the world's harshest environments and challenges.**

## Competitive Advantages

- Coatings with over **33 years global research/experience**
- Development with **NASA from 1989 to 1995**
- Accredited to **ASTM** and **International Standards**
- Energy savings cool coating **blocks 96.1% solar heat**
- **Corrosion, Lead paint** and **Asbestos encapsulation** coating rated to **6,780 psi / 478 bar**
- Extensive **global projects** and **industries** in every sector
- **NASA fire** rating, testing and approval
- Established multi-nationals in **Energy** and **Mining**
- **Net Zero Target** coatings solutions
- Dealers and Applicators **Australia wide**
- **Distributors and Projects global**
- **No 1 for corrosion protection by the Society of Petroleum Engineers** against 18 competitors

## Key Markets

- |                       |                           |
|-----------------------|---------------------------|
| • Military            | • Architecture            |
| • Energy & Mining     | • Aviation                |
| • Cold & Cool Storage | • Commercial & Industrial |
| • Shipping Containers | • Construction            |
| • Transportation      | • Marine                  |
| • Agriculture         |                           |

## Discriminators

- NEotech Coatings products have work with many different industries to provide some of the world's major ongoing challenges including **US Military**, energy, mining, heavy industry, marine, containers, infrastructure and more. **Made in the USA.**
- **20% to 50% energy** thermal insulation coatings
- Save more in maintenance, repair and replacement costs; easily retrofittable
- **Eliminate CUI** (Corrosion Under Insulation) in piping
- **Direct fuel savings** and reduce carbon emissions on cool and cold storage and transportation
- Provide thermal protection to all surfaces of any building material – **stop heat load**
- Provide **fire protection** 1200°C to all surfaces of any building material – **up to and beyond 7 hours**
- **World's only lead paint, asbestos, corrosion encapsulation** with a single coat system – replace sandblasting and Zinc 3 coat corrosion systems

## Some Key Customers

- |                            |                             |
|----------------------------|-----------------------------|
| • Rio Tinto                | • Berkshire Hathaway Energy |
| • Halliburton              | • Petrobras                 |
| • Exxon-Mobil              | • Pemex                     |
| • Mitsubishi               | • Nissan                    |
| • Sony                     | • Vodafone Group PLC        |
| • US Air Force and US Army | • Hoover Dam                |
| • Saudi Aramco Oil         |                             |

## Capabilities

- Future proof tough long lasting coatings protection
- Passive energy savings coatings - Net zero carbon emissions target solutions
- Unique corrosion, lead paint and asbestos encapsulation
- Hot surface and hot pipe coatings protection
- Prevention of corrosion under insulation
- Commercial, industrial and military applications
- Applied in the toughest environments and largest industries worldwide
- Meets all International Standards

## Quality Approvals

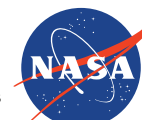

- **DNV** (Det Norske Veritas)
- **US Department of Energy**
- **Energy Star Rated**
- **IMO** (International Marine Organisations)
- **ABS** (American Bureau of Shipping)
- **USDA** Product Safety Branch
- **US Army Corps Engineers**

**US Army Corps of Engineers**
